Preface vii

Finite mode analysis of the generalized Kuramoto–Sivashinsky equation
C.M. Alfaro, R.D. Benguria and M.C. Depassier 1

Symmetry breaking, dynamical pulsations, and turbulence in the transverse intensity patterns of a laser: the role played by defects
E.J. D'Angelo, C. Green, J.R. Tredicce, N.B. Abraham, S. Balle, Z. Chen and G.L. Oppo 6

Patterns, space–time chaos and topological defects in nonlinear optics
F.T. Arecchi, S. Boccaletti, G. Giacomelli, G.P. Puccioni, P.L. Ramazza and S. Residori 25

Stability and noise in Taylor–Couette flow with through-flow
K.L. Babcock, D.S. Cannell and G. Ahlers 40

Coherent structures in random media and wavelets
G. Berkooz, J. Elezgaray and P. Holmes 47

Numerical results of 3D convection in a binary mixture for a positive separation ratio
M. Bestehorn 59

Study of a model of thermal convection in cylindrical containers
M. Bestehorn and C. Pérez-García 67

Experiments on three systems with non-variational aspects
E. Bodenschatz, D.S. Cannell, J.R. de Bruyn, R. Ecke, Y.-C. Hu, K. Lerman and G. Ahlers 77

Spatio-temporal structures in phase-turbulent convection
F.H. Busse, M. Kropp and M. Zaks 94

Mean flow suppression by endwalls in oscillatory binary fluid convection
T. Clune and E. Knobloch 106

Disorder dynamics of arrays in Bénard convection
P. Cerisier, H.N. Thi and B. Billia 113

Strong resonances of spatially distributed oscillators: a laboratory to study patterns and defects
P. Coullet and K. Emilsson 119

Phase instability and defect behavior in modulated wave patterns
P. Coullet, K. Emilsson and D. Walgraef 132

Traveling waves in pure fluids locally heated along wires
M. Dubois, F. Daviaud, O. Ronsin and P. Bergé 140

Pattern formation in rotating Bénard convection
M. Fantz, R. Friedrich, M. Bestehorn and H. Haken 147

Dynamics of spiral rings in the three dimensional Ginzburg–Landau equation
T. Frisch and S. Rica 155

Noise and pattern selection in the one-dimensional Swift–Hohenberg equation
E. Hernández-Garcia, M. San Miguel, R. Toral and J. Viñals 159

Gravitational instabilities of thin liquid layers: dynamics of pattern selection
L. Limat, P. Jenffer, B. Dagens, E. Touron, M. Fermigier and J.E. Wesfreid 166

Convection in binary mixtures: the role of the concentration field
M. Lücke, W. Barten and M. Kamps 183

Localized phenomena during spatio-temporal intermittency in directional viscous fingering
S. Michalland and M. Rabaud 197

Lateral instabilities of a wave front in the Ce-catalyzed Belousov–Zhabotinsky reaction
Z. Nagy-Ungvarai, A.M. Pertsov, B. Hess and S.C. Müller 205

Inverse cascades in turbulence
A.C. Newell 213

Mean flow effects in defects dynamics
L.M. Pismen 217

Long time behavior of solutions of nonlinear classical field equations: the example of NLS defocusing
Y. Pomeau 227

Singular solutions to the 3D axisymmetric incompressible Euler equations
A. Pumir and E.D. Siggia 240

Dynamics of defects in the complex Ginzburg–Landau equation
S. Rica and E. Tirapegui 246

Ginzburg–Landau equation coupled to a concentration field in binary–mixture convection
H. Riecke 253

Symmetry-breaking Hopf bifurcation in anisotropic systems
M. Silber, H. Riecke and L. Kramer 260

Stability limits of traveling waves and the transition to spatiotemporal chaos in the complex Ginzburg–Landau equation
A. Weber, L. Kramer, I.S. Aranson and L. Aranson 279

Measuring the growth rate of electroconvection by means of thermal noise
B.L. Winkler, W. Decker, H. Richter and I. Rehberg 284

Three-dimensional dissipative structures in reaction–diffusion systems
A. De Wit, G. Dewel, P. Borckmans and D. Walgraef 289

List of contributors 297
